**Harris County Municipal Utility District No. 136
September 9, 2010 Board Meeting
Engineer's Report**

A. General District

Our invoice for the month of August is not available so it will be included in next month's report.

B. Jackrabbit WWTP Improvements

Sander Engineering will present a recommendation to move forward with the design of the new lift station at their board meeting next week. Erik Miller with Sander said this should have been included in the original Engineering Report for the proposed improvements but wasn't. There have been no significant changes in flow to the plant that triggered this. There have been ongoing maintenance issues with the lift station and it was just overlooked according to Erik when the Engineering Report was prepared. He is estimating the new lift station will cost approximately \$600,000.

C. Water Well 2 Abandonment

AECOM has prepared a bid package for the capping of the well and will solicit prices from 3 contractors. Bids will be presented at the October meeting.
